

**UWA API**  
http requests  
Dom Manipulation  
Widget manipulation

**Widget**  
one File with  
XHTML  
+CSS  
+JS

**3. Parse data into JS Objects and create Dom Objects (ul/tables/..) from them to display inside the Widget:**  
  
<li>Customer: Mandy Maia</li>

**1. Make restfull Get Request:**  
myURL.com/rest/invoices/view/user/pass/all\_open/date/desc  
(show all invoices from user which are open and sort by date asc)

**JSON DATA**

**2. Check user, lookup invoices and render a page which contains the JSON data :**  
  
"Invoices": [{"Invoice": {"id": "11", ...

**Webservice**  
Sales-Xing  
API

**CakePHP Framework**
